1. Introduction

Welcome to the CMO Meetings Management system — the official platform used by the Chief Minister's Office, Government of Haryana, to schedule meetings, record action points (agenda items), and track the action taken on each of them until it is completed.

This manual is written for two categories of user:

- **Nodal Officer** — an account that represents a single department and manages all of that department's meeting action points.
- **Officer (multiple departments)** — an account tied to an individual officer who serves in more than one department, and who acts on the action points assigned to them across those departments.

Both roles share most day-to-day screens. Wherever behaviour differs between the two, this manual points it out with a coloured "Role note" box.

1.1 What you can do with this system

- See a live dashboard of your action points — how many are completed, in progress, or overdue.
- Open any meeting and review its action points and Minutes of Meeting.
- Add new action points and record Action-Taken Reports (ATRs) with supporting documents.
- Respond to explanation requests raised by the CMO administration.
- Track meetings whose minutes are still pending upload.
- Generate meeting and action-point reports and export them.

About terminology

Action point = agenda item = a single task arising from a meeting. The system uses these terms interchangeably. "Minutes of Meeting" refers both to the uploaded minutes document and, informally, to the set of action points recorded for a meeting.

1.2 What's new in this version

If you have used an earlier version of the system, the following changes affect you directly:

- **New role names.** The old "department login" is now called **Nodal Officer**, and a new **Officer (multi-department)** role has been added for officers who serve several departments.
- **Department switcher.** Multi-department officers now get a department filter in the top bar to focus on one department at a time (see §5.3).
- **You can now create action points.** Both Nodal Officers and Officers can add action points to meetings they are part of — this is no longer limited to the administration.
- **You can upload the Minutes of Meeting document.** Nodal Officers and Officers can attach or replace a meeting's minutes file.

- **Pending Upload Minutes.** A dedicated screen (and a blinking menu item) lists meetings whose minutes are still to be uploaded (see §12).
- **Action-point detail page.** Clicking any action point now opens a full detail page with its ATR history and a complete activity log (see §9).
- **Explanation workflow.** When the administration requests an explanation on one of your ATRs, a completed action point is automatically re-opened until you respond (see §11).
- **Everything is scoped to you.** Your dashboard, meetings, action points and reports now show only the data that belongs to your department(s) — nothing from other departments.

2. Understanding your role

Your role decides which data you see and which actions you may perform. The system has four roles in all: Administrator, CM (view-only), Officer (multi-department), and Nodal Officer. This manual covers the last two.

2.1 Nodal Officer (single department)

- Your account is permanently linked to one department.
- You see every meeting and action point that involves any officer of your department — and nothing from other departments.
- When you record an Action-Taken Report, you report through one of your own department's officers.
- You are the point of contact who ensures your department's action points are opened, worked on, and closed on time.

2.2 Officer (multiple departments)

- Your account is linked to your individual officer profile, which may belong to several departments.
- You see only the action points for which you are personally a responsible officer.
- A department switcher appears in the top bar so you can look at one of your departments at a time, or all of them together.
- When you create an action point, it is automatically assigned to you.

2.3 What each role can and cannot do

The table below summarises the two roles. “Scoped” means you only ever see your own data.

Capability	Nodal Officer	Officer (multi-dept)
Data you can see	Your one department	Your officer profile, across all its departments
Department switcher (top bar)	No — fixed to one department	Yes — when you serve more than one department
Dashboard	Yes (scoped)	Yes (scoped)
View meetings & Minutes of Meeting	Yes (scoped)	Yes (scoped)
Create an action point	Yes — assign to any meeting member	Yes — assigned to you only
Add an Action-Taken Report (ATR)	Yes — via your department's officers	Yes — as yourself
Upload / replace Minutes document	Yes	Yes
Reply to an explanation request	Yes	Yes

Capability	Nodal Officer	Officer (multi-dept)
Pending Upload Minutes list	Yes (department)	Yes (your meetings)
Reports (meetings & action points)	Yes (scoped)	Yes (scoped)
Due-task alerts (bell + login popup)	Yes	Yes
Edit / delete a meeting	No — administration only	No — administration only
Edit / delete an action point	No — administration only	No — administration only
Request an explanation	No — administration only	No — administration only
Masters, Groups, Users menus	No	No
Change your own password	Yes	Yes

3. Getting started — signing in

Your administrator creates your account and gives you a username and a temporary password. Open the application's web address in your browser to reach the sign-in screen.

3.1 Signing in

1. On the sign-in screen, type your **Username** in the first field.
2. Type your **Password**. Use the **eye** icon at the end of the field to show or hide what you type.
3. Click **Sign In**.
4. On success you are taken straight to your Dashboard. If any action points need your attention, a pop-up lists them right away (see §6).

If sign-in fails

The screen shows a red message if the username or password is wrong. Check for typing mistakes and that Caps Lock is off, then try again. If you still cannot get in, contact your administrator to reset your password — there is no self-service “forgot password” option.

3.2 Change your temporary password

The first thing you should do after signing in is set your own password. See §13.1 — Change password.

4. Finding your way around

After you sign in, every screen shares the same layout: a top bar across the top and a navigation menu down the left. The main area in the middle changes as you move between screens.

4.1 The top bar

Element	What it does
Menu button	Shows or hides the left navigation menu, giving the main area more room.
CMO Meetings Management	The application name and Government of Haryana emblem. Always visible.
Department filter	Officers with more than one department only. Lets you focus the whole application on one of your departments, or “All my departments”. See §4.3.
Bell icon	Your due-action-point alerts. A red number shows how many points are due or overdue. Click it for the list. See §6.
Your name	Opens a menu with your name, designation and location, plus Change Password and Logout.

4.2 The navigation menu

As a Nodal Officer or Officer you see the following menu items. (Administration-only sections such as Masters, Groups and Users are hidden from you.)

Menu item	Purpose	Section
Dashboard	Your live summary of meetings and action points.	§5
Meetings	The list of meetings you are part of.	§7
Agendas & Minutes of Meeting	Every action point you are responsible for, in one list.	§8
Pending Upload Minutes	Meetings whose minutes are still to be uploaded. Blinks while any are pending.	§12
Reports	Meeting and action-point reports, with export.	§13 / §12

4.3 The department switcher (Officers with multiple departments)

This applies to the Officer (multi-department) role only, and only when your profile belongs to more than one department. A filter box appears in the top bar. Use it to control what the whole application shows:

- **All my departments** (the default) — the dashboard, meetings, action points and reports include every department you serve.
- **A specific department** — pick one department to narrow every screen to just that department’s data. Your due-task alerts update to match.

When you change the selection, the current screen reloads automatically to reflect it.

Nodal Officer

You are always fixed to your one department, so the department switcher does not appear for you — there is nothing to switch between.

5. Your Dashboard

The Dashboard is the first screen you see after signing in. Everything on it is limited to your own data — your department (Nodal Officer) or your action points across your departments (Officer).

5.1 Summary cards

Five cards across the top give you the headline numbers. Click any card to jump straight to the matching list.

Card	Meaning
Meetings	How many meetings you are part of.
Action Points	Total action points you are responsible for.
Completed	Action points that are finished.
In Progress	Action points still being worked on.
Overdue	Action points whose due date has passed and are not yet completed.

5.2 Status donut & completion

A doughnut chart shows the split between Completed (green), In Progress (orange) and Overdue (red), together with your overall completion percentage.

5.3 Overdue & Due Today

Two tabs list the action points that need attention now — those that are Overdue and those Due Today. Click any row to open that action point's detail page.

5.4 Meetings overview table

Below the charts is a searchable, sortable table with one row per meeting. You can type in the search box to filter by subject or date, and click any column heading to sort.

Column	Meaning
Subject / Date	The meeting's subject and the date it was held.
Total Points	Number of action points in the meeting (that belong to you).
Completed / In Progress	How many of those points are finished or still open.
Overdue (0–7, 8–30, 31–60, 60+)	Overdue points grouped by how many days late they are.
Score	A performance score for the meeting (see §14.2).

Note

The cross-department comparison charts (“top / worst performing departments”) are shown only to the administration. As a Nodal Officer or Officer your dashboard is focused entirely on your own work.

6. Due action-point alerts

The system actively reminds you about action points that are approaching or past their due date, so nothing slips through.

6.1 The sign-in pop-up

Immediately after you sign in, if you have any action points that are due, overdue, or coming up in the next three days, a pop-up titled “Your Action Points” appears. It groups them into:

- **Due & Overdue** — points due today or already past due (past-due points show how many days late).
- **Upcoming — next 3 days** — points falling due within the next three days.

Click any item to open it, choose “View all” to go to your action-point list, or “Dismiss” to close the pop-up. It appears once per sign-in.

6.2 The notifications bell

The bell icon in the top bar is always available. The red badge shows how many points are currently due or overdue. Click the bell to see the list at any time and click an entry to open that action point. When there is nothing due, it reads “You’re all caught up — nothing due.”

Tip

The alerts refresh automatically while you are signed in, so the bell count stays current as you work through your points.

7. Meetings

The Meetings screen lists the meetings you are part of — for a Nodal Officer, every meeting that involves your department; for an Officer, every meeting where you are a responsible officer.

7.1 Reading the meetings list

Column	Meaning
Date / Subject / Place	When, what and where the meeting was held.
Members	Number of officers in the meeting (that are within your scope).
Total Points	Number of action points in the meeting.
Completed / In Progress	Points finished vs still open.
Overdue (0–7, 8–30, 31–60, 60+)	Overdue points grouped by how many days late they are.
Progress	Average progress across the meeting's points.
Score	The meeting's performance score (see §14.2).
Opened	How many points have been opened by the concerned department.

Click any column heading to sort. To open a meeting's action points, click its row — this takes you to the **Agendas & Minutes of Meeting** screen for that meeting (§8.2).

Officers with multiple departments

If you have picked a single department in the top-bar switcher, this list shows only meetings for that department. Switch back to “All my departments” to see everything.

Note

Scheduling, editing and deleting meetings is done by the administration, so the “Actions” column and the “Schedule Meeting” button do not appear for you.

8. Agendas & Minutes of Meeting

This is where you do most of your work. There are two views: the overall list of all your action points, and the per-meeting view.

8.1 The Action Points list (all meetings)

Open **Agendas & Minutes of Meeting** from the menu to see every action point you are responsible for, across all your meetings, in a single list. Use the **All / In Progress / Overdue / Completed** buttons at the top to filter by status.

Each row shows the meeting, the action point, the concerned officer, the due date, the location/scope, progress and status. Click any row to open the action point's detail page (§9).

8.2 A single meeting's action points

Clicking a meeting (from the Meetings list, the dashboard, or a report) opens that meeting's action points. At the top you see the meeting's subject, date and place, and four count tiles:

- **Total Points, Completed, In Progress and Overdue.**

Click a tile to filter the table below to just those points; click it again to clear the filter. Each action-point row shows its text, concerned officer, due date, progress and status — click a row to open its detail page.

8.3 The Minutes of Meeting document

Each meeting can have a Minutes-of-Meeting document (a scanned or typed minutes file) attached. On the meeting's action-points screen, the buttons at the top let you:

- **View Minutes** — appears when a document has already been attached. Opens it in a new browser tab.
- **Upload Minutes / Replace Minutes** — attach the minutes file, or replace the existing one.
 1. Click **Upload Minutes** (or **Replace Minutes** if one already exists).
 2. Choose a JPG, PNG, PDF, DOC or DOCX file of 10 MB or less.
 3. The file uploads and the View Minutes button then appears.

Who can upload minutes

You may upload the minutes only for a meeting you are part of. Administrators can upload for any meeting. The document is stored securely — only people entitled to the meeting can open it.

9. The action-point detail page

Clicking any single action point — anywhere in the system — opens its detail page. This is the hub for one action point: its particulars, every Action-Taken Report against it, and a full activity log.

9.1 Header details

The top card shows the action-point text, a coloured status chip (Completed / In Progress / Overdue) and a set of information tiles:

Tile	Meaning
Concerned Officer	The officer(s) responsible for the point.
Due Date	The current due date, with the number of days late if it is overdue.
Scope	The district, or “Headquarters”, the point applies to.
Progress	The latest reported progress percentage.
Opened	When the point was first opened by the concerned department, and by whom.

9.2 Action-Taken Reports (ATRs)

The middle card lists every ATR recorded against the point — the reporting officer, the action taken, status, progress, date, any attached document, and the explanation exchange (if any). Adding an ATR is covered in §10.

9.3 Activity log

The bottom card is a time-stamped history of everything that has happened to the point: when it was created, when your department opened it, each ATR that was submitted, and every explanation request and reply. It is built automatically — you do not maintain it.

9.4 Buttons on this page

Button	Available to you?
Add ATR	Yes — unless the point is already Completed (see §10).
Provide (explanation)	Yes — appears against an ATR when the administration has requested an explanation (§11).
Edit / Delete	No — editing and deleting an action point is done by the administration.

Nodal Officer

When you open an action point, the system records that your department has “opened” it (with the date and your name). This is how the administration can see which departments have seen their tasks — so do open your points promptly.

10. Recording work on action points

10.1 Adding a new action point

You can add action points to a meeting you are part of. Open the meeting (§8.2) and click **Add Action Point**. Fill in the form:

Field	What to enter
Action Point / Agenda	The task to be done. Required.
Responsible Officer(s)	Nodal Officer: choose one or more officers from the meeting's members. Officer: fixed to you — the point is assigned to you automatically.
Due Date	The date the task must be completed by. It cannot be earlier than the meeting date.
District / Scope	"Headquarters" or a specific district the task relates to.

1. Click **Add Action Point** on the meeting's screen.
2. Type the action point text.
3. Choose the responsible officer(s) — or confirm it is assigned to you (Officer role).
4. Pick a due date on or after the meeting date, and a district/scope.
5. Click **Save**. The new point appears in the list as "In Progress".

10.2 Adding an Action-Taken Report (ATR)

An ATR records the progress made on an action point. Open the action point (§9) and click **Add ATR**. Complete the form:

Field	What to enter
Reporting Officer	The officer reporting the action. Nodal Officer: choose one of your department's officers (auto-selected if only one applies). Officer: the officer(s) responsible for the point.
Remarks / Action Taken	A description of what has been done. Required.
Status	"In Progress" or "Completed".
Progress	For In Progress, choose 10%–90%. For Completed the system sets 100% automatically.
Revised Due Date	Optionally revise the due date (see the rule below).
Attach Document	Optionally attach a supporting file (JPG, PNG, PDF, DOC, DOCX; max 10 MB).

1. On the action point's page, click **Add ATR**.
2. Select the reporting officer and describe the action taken.
3. Set the status. If still ongoing, pick a progress percentage; if finished, choose Completed.
4. Optionally set a revised due date and attach a document.
5. Click **Save ATR**.

The latest ATR you save becomes the action point's current status and due date, and the progress bar updates to match.

Rules to remember

Revised due date: while a point is still In Progress its revised due date cannot be in the past. Mark the ATR Completed if you need to record a past date (because the work is already done).

Completed points are locked: once a point is Completed you cannot add further ATRs — the Add ATR button is replaced by a note. (An administrator can re-open it by requesting an explanation.)

11. Responding to explanation requests

The CMO administration may ask your department to explain a particular Action-Taken Report — for example, to justify slow progress. This is called an explanation request.

11.1 How it works

- The administration raises a request against a specific ATR. You do not raise requests yourself — you respond to them.
- When a request is raised on a completed action point, the point is automatically re-opened (its status returns to In Progress) until you reply, and the reported progress is reduced slightly.
- The request appears on the action point's detail page, in the Explanation column of the ATR concerned.

11.2 Replying to a request

1. Open the action point (from your due alerts, the action-point list, or the meeting).
2. Find the ATR that shows a **Requested:** note in its Explanation column, and click **Provide**.
3. Type your explanation. Required.
4. Optionally attach a supporting document (JPG, PNG, PDF, DOC, DOCX; max 10 MB).
5. Click **Submit**. Your reply is shown beneath the request, and the administration can see it.

Tip

You can reply to an explanation request even if the action point has since been completed — so you are never blocked from responding.

12. Pending Upload Minutes

Pending Upload Minutes helps you keep on top of meetings whose minutes have not yet been fully recorded. The menu item **blinks and shows a count** whenever any meeting is still pending, so you can see it at a glance.

12.1 What counts as “pending”

- **Nodal Officer** — meetings of your department that still have no action point recorded for any of the department’s officers, or whose minutes document has not been uploaded.
- **Officer** — meetings you are part of that still have no action point recorded for you, or whose minutes document has not been uploaded.

12.2 Clearing a pending meeting

Open the screen from the menu. Each row shows the meeting date, subject and place, whether an Action Point and a Minutes Document have been added, and an action button.

1. Click **Upload Minutes** on the meeting’s row. This opens the meeting’s action-points screen.
2. Add at least one action point for the meeting (§10.1), and/or upload the Minutes document (§8.3).
3. As soon as the meeting is complete, it drops off the pending list and the menu stops blinking.

When nothing is pending, the screen shows “No pending minutes — every meeting has its action points uploaded.”

13. Reports

The Reports screen has two tabs. Both show only your own data.

13.1 Meetings Report

- Pick a **From** and **To** date and click **Apply** to list meetings in that range.
- Columns include the date, subject, place, member count, and a breakdown of total, completed, in-progress and overdue points.
- Click a meeting's subject to open its action points.

13.2 Action Points Report

- Filter by status, then click **Download CSV** to export the list to a spreadsheet.
- Columns include the meeting, action point, concerned officer, due date and status.
- Click any row to open the action point's detail page.

14. Your account

14.1 Change password

1. Click your name in the top bar and choose **Change Password**.
2. Enter your current password.
3. Enter a new password (at least 6 characters) and confirm it.
4. Click **Update Password**. A confirmation message appears.

14.2 Logout

Click your name in the top bar and choose **Logout**. Always log out on shared or public computers.

15. Reference

15.1 Action-point statuses

Status	Meaning
Completed	The work is finished (an ATR marked it Completed).
In Progress	The point is open and not yet past its due date.
Overdue	The due date has passed and the point is not Completed.

15.2 How progress and score are worked out

- **Progress bar** — a Completed point counts as 100%; otherwise it shows the progress of its most recent ATR. A meeting's progress is the average across its points.
- **Meeting score** (–100 to +100) — each Completed point adds to the score, each In-Progress point adds half as much, and each Overdue point subtracts. A meeting of all-completed points scores +100; all-overdue scores –100.
- **Overdue buckets** — overdue points are grouped by how many days late they are: 0–7, 8–30, 31–60 and more than 60 days.

15.3 File uploads

Wherever you attach a document — an ATR, an explanation, or the Minutes of Meeting — the same rules apply:

- Allowed types: JPG, JPEG, PNG, PDF, DOC, DOCX.
- Maximum size: 10 MB.

15.4 Frequently asked questions

I can't see a meeting / action point that I expected. You only see items within your scope. A Nodal Officer sees their department's items; an Officer sees points they are responsible for. If

you serve several departments, check the top-bar department switcher isn't narrowed to one department.

The “Add ATR” button has disappeared. The action point is Completed, which locks it. An administrator can re-open it (usually via an explanation request).

I can't edit or delete an action point or meeting. These actions are reserved for the administration. You can add action points and ATRs, and upload minutes.

The menu is blinking. You have meetings pending in “Pending Upload Minutes” — open it to see which, and add the missing action points or minutes document.

I forgot my password. There is no self-service reset. Contact your administrator.

15.5 Glossary

Term	Meaning
Action point / Agenda item	A single task arising from a meeting.
ATR (Action-Taken Report)	A dated report of the progress made on an action point.
Minutes of Meeting	The record of a meeting — its action points and/or the uploaded minutes document.
Nodal Officer	An account that manages one department's action points.
Officer (multi-department)	An account for an individual officer who serves several departments.
Scope	The set of data you are allowed to see — your department(s) or your own points.
Explanation request	A query raised by the administration asking you to justify an ATR.

End of manual — CMO Meetings Management. Government of Haryana, Chief Minister's Office.
